Additional lines may be added as necessary. The format of the numbers must include neither decimals nor separators.

Product categories must be disclosed using the CN codes in accordance with Article 3.

The description must be established on the basis of the combined nomenclature as set out in Annex I to Regulation (EEC) No 2658/87 or a more detailed description.

The total number of units discarded during the disclosure period must be provided for each product category. The number of units may be estimated on the basis of the total weight of units discarded. Multiple items sold together, such as cosmetic or first aid kits, may be considered as one unit and may, where appropriate, indicate more than one CN code.

The total weight of units discarded must be the combined weight of all units discarded during the disclosure period per each product category, measured in kilograms. The total weight of units may be estimated on the basis of the number of units discarded.

Reasons for discarding the products must, where applicable, refer to the reasons listed in any delegated acts adopted pursuant to Article 5 of Regulation 2024/1781. A more detailed explanation may be added. If units of the same product category are discarded for different reasons, a separate line is necessary for each reason, indicating the number and weight of units for each reason.

Waste treatment operations must indicate the proportion of discarded products delivered to each specific operation. Information on waste treatment must be retrieved from waste treatment operators that collect unsold consumer products. Where information on the treatment of discarded products is not available, treatment may be listed as 'unknown'.
